Career Objective

Passionate about crafting exceptional user experiences and solving complex challenges, I am a skilled Front-End Developer with over 5+ years of experience in the IT industry. Proficient in a wide range of technologies including React JS, Redux, Redux Saga, JavaScript, TypeScript, Node JS, HTML, CSS, SASS, Material UI, and Bootstrap, I am constantly seeking opportunities to enhance my professional and technical skills. Currently, I am working as a Front-End Developer at IBM, contributing to developing cutting-edge projects. Previously, I was part of the Capgemini team, where I honed my expertise in front-end development.

SKILLS

HTML, CSS, SASS, Material UI, Bootstrap, JavaScript, React JS, Redux, Redux Saga, TypeScript, React Testing Library, JEST, JIRA, Azure, GitHub, GitLab, Figma, Zeplin, Adobe XD, VS Code.

Work Experience

➢ Employed at IBM India as Senior Software Engineer (Oct-2021 - Current)

➢ Employed at Capgemini Technology Services India Limited as Software Engineer (Feb 2019 – Oct 2021).

Projects

➢ **Name** - "**ALCM PEGIT - Current**"
   Role: Senior Developer
   Technology: JS, React JS, Redux, Redux Saga, Adobe XD, GIT, SonarQube, JIRA, ES-Lint
   About: ALCM is a startup located in South Africa, which mainly focuses on Home Improvement systems. Here we connect homeowners to service providers like electricians and mechanics so that they can get their requirements fulfilled. This project **we have developed from scratch**, and this project was an MVP.
   Responsibilities:
   - Interacted with the business to gather requirements.
   - Develop, test, and maintain front-end applications using React JS.
   - The components delivered should be of high quality and follow all the aspects of UX design.
   - Followed excellent coding standards with the help of ES-Lint and SonarQube.
   - Developed reusable components. Collaborated with backend teams to implement API integration in new features.
   - Participated in PR reviews and pair programming.

➢ **Name - "Lowe's US"**
   Role: Senior Developer
   Technology: JS, React JS, Redux, NodeJS, Graph-QL, Typescript, Jest, Figma, SonarQube, JIRA, CYPRESS.
   About: Lowe's is a retail company which is mainly focusing on Home Improvement, Company operates a chain of retail stores in the United States and Canada. I've worked in the vendor onboarding department where we will create a space for the vendor where we will onboard vendor who wants to sell their products in Lowe's store and exit formalities of vendor and many more.
   Responsibilities:
   - Interacted with the business to gather requirements.
   - Develop, test, and maintain front-end applications using React JS.
   - Components delivered should be of high quality and customer experience should be efficient.
   - Collaborated with cross-functional teams to implement new features and end-to-end integration.
   - Written Unit test cases for better code coverage and error detection.
   - Written End to End test with cypress, with cypress we can simulate user behavior through automation.

- ➤ **Name - "BOOTS UK"**
  Role: Senior Developer
  Technology: HTML, CSS, JS, React JS, Redux, NodeJS, Jest, Zeplin, SonarQube, Storybook, JIRA
  About: Boots is a retail company which is mainly focusing on Beauty and Pharmacy products. I've worked in the add-to-cart and checkout areas. Initially, it was developed in HCL commerce but we have migrated its front-end to React js and interacting with HCL commerce using node JS.
  Responsibilities:
  - Interacted with the business to gather requirements.
  - Develop, test, and maintain front-end applications using React JS.
  - Developed reusable components for performance optimization using a storybook.
  - Collaborated with cross-functional teams to implement new features and end-to-end integration.
  - Written Unit test cases for better code coverage and error detection.

- ➤ **Name - "Truist Bank (SunTrust + BB&T)"**
  Role: Developer
  Tools: HTML, CSS, JS, React JS, Redux, Figma, SonarQube, ALM.
  About: Truist is the largest financial bank in the USA. I've worked in the privacy and preference system area. We have developed this application from scratch.
  Responsibilities:
  - Interacted with the business to gather requirements.
  - Develop, test, and maintain front-end applications using React JS.
  - Developed reusable components for performance optimization using a storybook.
  - Collaborated with cross-functional teams to implement new features and end-to-end integration.
